What is a 12V 80Ah battery?

The 12V 80Ah battery is a LiFePO4 lithium chemistry battery. It offers BMS controlled safety, long life, and fast-charging performance. The built-in Battery Management System (BMS) embeds smart balancing algorithms that control all cell voltages in the battery, ensuring they are constantly at the same voltage level and optimizing battery capacity. For more details, please check the ELB certification center.

Is a 12ah lithium battery better than a 48AH battery?

Thus a 12Ah lithium battery would perform closer to a 48Ah lead-acid battery rating for higher discharge currents and life performance. Ionic's lithium-ion batteries have 1/3 the internal resistance of a similar capacity lead-acid battery and they can be safely discharged to 90% DOD.

Will a 12ah lithium battery damage a lead-acid battery?

Going below 50% DOD will damage a lead-acid battery, even if they claim to be a deep discharge battery. Thus a 12Ah lithium battery would perform closer to a 48Ah lead-acid battery rating for higher discharge currents and life performance.

How long does a deep cycle lithium ion battery last?

A. Ionic's "Deep Cycle" batteries have true lithium capacity rating at 1C discharge rate meaning a 12Ah "Deep Cycle" lithium-ion battery will be able to provide 12A for 1 hour.
