

35kv capacitor discharge rod

What is the Est high voltage discharge rod?

The EST high voltage discharge rod has been designed for the safe discharging and earthing/grounding of high voltage cables and test units and is perfect for damped discharge and direct, visible earthing/grounding.

What is a GfK discharge rod?

The discharge rods are made of GFK (fibre glass strengthened plastic), come with a handle, and have a conservatively rated clearance against physical contact with high voltage. You also have 6 versions of the discharge rod to choose from for different voltages, resistances, and lengths.

Which discharge rods are suitable for AC & DC voltage?

Both discharge rods are suitable for AC and DC voltage, are 32mm in diameter and supplied with cushion soft carrying case. Ordering Information

How does a SebaKMT discharge rod work?

In its tip with which the live conductor is touched the SebaKMT discharge rod features a discharge resistor which limits the discharge current and ensures a damped discharge. Within a split second, most of the charge of the cable has flown off a post charging effect is thus eliminated.

How does the Megger Seba KMT discharge rod work?

The Megger Seba KMT discharge rod touches the live wire with a tip that features a discharge resistor that limits the discharge current and ensures a damped discharge. Within a split second most of the cable's charge has flown off, eliminating the post-charging effect. (810300) EST 35 35kV (6 uF max. Capacity) (810003725) EST 50 50kV (6 uF max.

What is Megger SebaKMT Est high voltage discharge rod?

Megger SebaKMT EST High Voltage Discharge Rod designed for damped discharge & direct, visible earthing. Features a discharge resistor which limits the discharge current & ensures a damped discharge. Need Help ? Contact Us Request Demo

The EST high voltage discharge rod has been designed for the safe discharging and earthing/grounding of high voltage cables and test units and is perfect for damped discharge and direct, visible earthing/grounding. It's tip houses a live conductor and the rod features a discharge resistor that limits the discharge current and ensures a damped ...

The EST high voltage discharge rod has been designed for the safe discharging and earthing/grounding of high voltage cables and test units and is perfect for damped discharge and direct, visible earthing/grounding. It's tip houses a live ...

35kv capacitor discharge rod

The EST discharge rod safely grounds high-voltage cables and equipment. It features a live conductor tip and internal resistor that provides a damped discharge to eliminate post-charging effects. Available for 35-150kV applications. GFK construction with rated HV clearance. Includes handle and manual.

High Voltage 35 Kv Static Copper Earthing Portable 11kv to 500 Kv FRP Discharge Rod, Find Details and Price about Portable Telescopic Fiberglass Discharge Rod Telescopic Safety 33kv Discharge Rod from High Voltage 35 Kv Static Copper Earthing Portable 11kv to 500 Kv FRP Discharge Rod - XIN CHENG INDUSTRY MATERIAL CO., LTD. Home Electrical & ...

High voltage devices such as Cables, Capacitors, Insulators, and Bus-bars will retain their charged energy after disconnection from supply or switching off it. Hard discharge rod is used to discharge such device. Features: Maximum discharge capacity up to 100 kV. Maximum discharge capacitance up to 20 uf.

EST 35 Discharge Rod 35kV (Max. 6uF) Megger SebaKMT EST High Voltage Discharge Rod designed for damped discharge & direct, visible earthing. Features a discharge resistor which ...

The Seaward SDR35 is a safe discharge rod, designed to conduct the safe damp discharge of residual charge on a cable or piece of electrical equipment with volages up to 35kV by limiting the discharge current.

SDR35 HV Discharge Rod. This instrument will allow you to conduct the safe damp discharge of the residual charge on the cable / equipment by limiting the discharge current. Each model ...

The SF 35 are safe discharge rods, designed to conduct the safe damp discharge of residual charge on a cable or piece of electrical equipment with voltages up 35kV respectively by limiting the

Resistive Electric High Voltage Telescopic Discharge Rod, Find Details and Price about Portable Telescopic Fiberglass Discharge Rod Telescopic Safety 33kv Discharge Rod from Resistive Electric High Voltage Telescopic Discharge Rod - XIN CHENG INDUSTRY MATERIAL CO., LTD. Home Electrical & Electronics Breaker & Protector Earthing System Lightning Protection ...

Seaward SDR11 HV Safe Discharge Rod - Suitable for voltages to 11kV. The SDR11 safe discharge rod is designed to conduct the safe damp discharge of residual charge on a cable or piece of electrical equipment with voltages up to 11kV by limiting the discharge current. Also known as a discharge stick or 11kv earthing rod. Seaward SDR11 Key Features:

SDR35 HV Discharge Rod. This instrument will allow you to conduct the safe damp discharge of the residual charge on the cable / equipment by limiting the discharge current. Each model features high grade glass fibre tubing and incorporates encapsulated resistor chains.

Discharge Rod for High-Voltage Capacitors: 363 800 000 00092: Discharge Rod for High-Voltage Capacitors: 363 800 000 00158: Discharge Rod for Electrostatic Air Filter Equipment: 363 800 000 00159:

35kv capacitor discharge rod

Discharge Rod for Electrostatic Air Filter Equipment

Choice of 6 versions of discharge rod Complies with EN 50191, EN 61230 and EN 61219 Versions for 35 kV to 150 kV working. Discharge resistors ensure damped discharge For damped discharge and direct, visible earthing.

High Voltage 110 Kv Static Copper Earthing Portable 11kv to 500 Kv FRP Discharge Rod, Find Details and Price about Portable Telescopic Fiberglass Discharge Rod Telescopic Safety 33kv Discharge Rod from High Voltage 110 Kv Static Copper Earthing Portable 11kv to 500 Kv FRP Discharge Rod - XIN CHENG INDUSTRY MATERIAL CO., LTD. Home Electrical & ...

The SF 35 are safe discharge rods, designed to conduct the safe damp discharge of residual charge on a cable or piece of electrical equipment with voltages up 35kV respectively by ...
