

## 474 SMD capacitor

Figure 5: Ceramic Capacitors o SMD Ceramic Capacitor Codes. Surface mount ceramic capacitors (SMD) are extremely compact, often lacking visible markings due to their small size. These components are typically identified and sorted during manufacturing using advanced automated equipment that reads machine-readable markings invisible to the ...

SMD capacitor codes are a standardized system of markings printed on the surface of SMD capacitors. These codes provide essential information about the capacitor's characteristics, such as capacitance value, tolerance, voltage rating, and temperature coefficient. Understanding these codes is crucial for selecting the appropriate capacitor for a specific ...

The CL Multilayer Ceramic Capacitors (MLCC) provide a structural capacity to mount chips on a PCB at high speed. Typical applications include automotive, smartphones, PC, HDD/SSD boards, tablets, displays, game machines, and DC-DC converters.

Capacitor Value Conversion Table This is a handy table that makes it easier to convert capacitance values between picofarads, nanofarads, and microfarads. It also explains Vishay's three digit encoding system for MLCC capacitor part numbers. We hope that you find this useful. Notes: 1. Example from top row of table: 1.0pF (pico Farad) = 0.0010nF (nano Farad) = ...

This capacitor is designed so that the parasitic inductance component (ESL) that the capacitor has on the high frequency side becomes lower. Product suitable for acoustic noise reduction and low distortion

We offer a broad range of SMD Aluminium Electrolytic Capacitors with capacitance values from 0.1&#181;F to 15F, and DC voltage ranging from 1.4V to 450V. What are SMD Aluminium Electrolytic Capacitors? Aluminium electrolytic capacitors are polarized electrolytic capacitors whose anode electrode (+) is made of a pure aluminium foil with an etched surface. The aluminium forms a ...

0.47uf 0805 Surface Mount Multilayer Ceramic SMD Capacitor, it is high quality with high temperature tolerance caps, a rectangular block of ceramic dielectric in which a number of interleaved metal electrodes are contained. Specifications: Package Includes: 20 x 0.47uF 50V ceramic SMD Capacitor 0805. \* Image shown is a representation only.
