My inverter, batteries and battery cabinet are on their way from Signature Solar. Very exciting. Except I imagine my pallet of equipment duking it out with all the holiday deliveries. Regarding the small battery cables, I will be using the short cables that come with the batteries. I thought I read that those cables are 6AWG, but I won't know ...

A 48V battery system typically consists of multiple lithium-ion cells configured to deliver a nominal voltage of 48 volts. These systems are designed to provide a balance between high power output and safety, making them ideal for applications such as electric vehicles (EVs) and renewable energy storage.
