This smart solar street light pole can be equipped with a remote monitoring system. The split design can maximize the number of solar panels and improve battery life while saving manufacturing costs. At present, there are three styles of optional height: 6m, 8m and 10m.

In-built solar batteries within each solar street light act to conserve energy throughout the day, with advanced features that ensure batteries cannot overheat or stop working in cold or wet conditions. Our Camps Bay light is equipped, as are most models in the Solight range, with ALS technology and automatic day and night sensors.
