

Address of Venezuelan energy storage company

How much oil does Venezuela have?

Venezuela's oil reserves, estimated at 302.3 billion barrels in 2019, are by far the largest of any country in Latin America and the Caribbean. Venezuela also has nearly 70% of the region's natural gas reserves.

Is Venezuela a producer or exporter of natural gas?

As a founding member of the Organization of Petroleum Exporting Countries, Venezuela is both a producer and an exporter of this energy resource, and is a world leader in exports of natural gas, liquefied gas, butane, and propane. We came to Venezuela in 1993 to develop our Upstream business through different projects spread out across the country.

What type of energy does Venezuela use?

Venezuela relies heavily on domestic production of fossil fuels, with oil and natural gas comprising approximately 90% of the country's total energy supply. Hydro power also plays a key role in electricity generation, accounting for roughly half of installed capacity.

How much electricity does Venezuela generate a year?

Latest estimates show Venezuela generating between 109 and 133 TWh of electricity annually, with 62% coming from hydropower and the remaining 38% from hydrocarbon power plants. The majority of Venezuela's electrical demand is met by the Simon Bolivar Hydroelectric Plant.

What natural resources does Venezuela have?

Located south of the Caribbean sea, Venezuela is highly rich in natural resources. As a founding member of the Organization of Petroleum Exporting Countries, Venezuela is both a producer and an exporter of this energy resource, and is a world leader in exports of natural gas, liquefied gas, butane, and propane.

Where is Venezuela located?

Venezuela is a federal republic located on the northern coast of South America. Oil was discovered in the early 20th century and, today, Venezuela has the world's largest known oil reserves and has been one of the world's leading exporters of oil.

The Push for Renewable Energy in Venezuela. At the moment, Venezuela's energy infrastructure depends on hydroelectric power that sites like the Guri dam generate, which is located on the Caroná River. Most estimates place the percentage of Venezuela's electricity at the Guri dam at over 50%, while some sources claim that as much as 70% or ...
