The effect of 500 kWp solar PV on IITGN 11 kV, 3-phase, 3-wire ring-main distribution network is examined in full-day variations of load demand, and the impact of Automatic Power Factor ...

This empirical analysis of the terrestrial ring current, as measured by Dst, uses conditional probability density in Dst phase space to determine the evolution of the ring current. This analysis method does not assume a dynamic equation, but merely requires that the evolution of Dst depends on Dst and the solar wind. Our simple model, with seven nontrivial parameters, ...
