

# Basseter lithium battery new technology franchise store

How much does a batteries expert franchise cost?

The initial franchise fee for Batteries Expert is \$50,000, which grants you the right to use the brand in a defined territory for a duration of 5 years. What investment is required to open a Batteries Expert franchise?

What is a batteries expert franchise award?

This prestigious award was presented to the team on behalf of the Canadian Franchise Association in recognition of their solid business performance, involvement in the community and their overall star quality. We are proud owners of 3 different Batteries Expert stores, all of which are located in different towns.

Why should you join the batteries expert family?

Joining the Batteries Expert family is more than just acquiring a simple battery store, it's boarding alongside a brand committed to the energy transition and a more sustainable future. With our parent distributor TCED present in the market since 1964, you benefit from 60 years of expertise in both operations and customer service.

Who is Lishen battery?

Lishen Battery, established in 1997 and headquartered in Tianjin, China, is a leading lithium-ion battery manufacturer with a significant market share and a broad range of products. The company's commitment to growth and its collaborations with world-class enterprises highlight its prominence in the industry.

What is the future of battery technology?

Innovations such as solid-state batteries, silicon anodes, and advanced recycling technologies are at the forefront of this transformative journey. These advancements hold the potential to revolutionize the industry, offering more efficient, durable, and sustainable battery solutions.

What makes Panasonic a leader in the lithium-ion battery market?

Panasonic Energy Co., Ltd., with a rich history and strong market presence, is a key player in the global lithium-ion battery market. Its commitment to advancing technology and sustainable solutions marks its significant industry presence.

With the rising global demand for eco-friendly battery solutions, BSI franchisees often see a quicker return on investment than other business ventures. Our proven business model ...

Most battery storage technology relies on lithium, a silvery-white metal used to make batteries in EVs and mobile devices. The demand for lithium is expected to be so high from electric carmakers that the world could face shortages by 2025, the ...
