

Battery companies suddenly stopped production

Should you invest in a battery company?

Jill Pestana, who leads the battery practice in North America for the consulting firm Accenture, adds that it's hard for battery companies to navigate the period between receiving a major investment and achieving profitability because it can be long, and many investors are hoping for a quick return.

How did Northvolt enter the battery manufacturing industry?

Northvolt entered the battery manufacturing industry without any expertise but with a sense of hubris. In standard battery production, the cell manufacturer defines the process parameters, while the equipment supplier designs machines to meet those specifications.

Is Freyr battery struggling to scale up a low-cost battery manufacturing technology?

Freyr Battery recently announced that it is struggling to scale up a new low-cost battery manufacturing technology licensed from 24M. The company plans to lay off employees and cut spending by 50% while it resolves issues with the process.

What happened to Northvolt batteries in 2022?

By 2022, despite holding USD 30 billion in orders, Northvolt still hadn't achieved large-scale battery production. The situation remained unchanged in 2023. In June 2024, BMW finally ran out of patience and canceled its USD 2 billion battery contract. Five months later, Northvolt declared bankruptcy.

Will Europe's best shot at a home-grown electric vehicle battery champion stall?

At least one person was killed. Northvolt's shock decision this week to shrink its operations and cut jobs has sparked fears that Europe's best shot at a home-grown electric vehicle battery champion may stall, sector experts and people familiar with the situation told Reuters.

How long does it take Northvolt to produce a battery?

"We can raise a factory's battery yield to 96% in just four months. Northvolt took four years and only achieved 70%," said a Chinese executive after a recent interaction with Northvolt. By 2022, despite holding USD 30 billion in orders, Northvolt still hadn't achieved large-scale battery production. The situation remained unchanged in 2023.
