What is dimethyl carbonate used for?

It is used in the manufacturing of lithium-ion batteries, production of polycarbonates, lubricants, polyurethanes, cleaning and degreasing solvents, construction materials such as paints and adhesives, fuel additives, and in biodiesel production. Dimethyl Carbonate (DMC) is also considered a green reagent.

Can alkyl carbonates be used for lithium ion battery electrolytes?

Alkyl carbonates find applications as solvents for lithium ion battery electrolytes and the use of high quality battery grade electrolytes having extremely low water (<10 ppm) and acid (<10 ppm) contents are critical for achieving high electrochemical performance. These additives have low water content (less than 100 ppm).
