

Battery grade lithium carbonate price in Libreville

What is lithium carbonate (CNY/Mt)?

The pricing for Lithium Carbonate 99.5% (CNY/mt) is considered the benchmark for lithium pricing worldwide. Lithium Carbonate 99.2%: Technical or Industrial Grade, used in glass, ceramics, and greases. Lithium 99.9%: Used in pharmaceuticals or aerospace applications where a high degree of purity is necessary.

What is the current price of Lithium Carbonate 99.5%Min China Spot?

The Lithium Carbonate 99.5%Min China Spot price today is 72,500.00. 995C-LTCB is the symbol for Lithium Carbonate 99.5%Min China Spot.

What is lithium carbonate used for?

Lithium Carbonate 99.5%: Battery Grade, essential for lithium-ion batteries in EVs and portable electronics. The pricing for Lithium Carbonate 99.5% (CNY/mt) is considered the benchmark for lithium pricing worldwide. Lithium Carbonate 99.2%: Technical or Industrial Grade, used in glass, ceramics, and greases.

Why are lithium carbonate prices low?

Lithium carbonate prices have been steadied near the lowest in over three years at CNY 72,500 per tonne in September. This is due to persistent concerns about an oversupplied market, as lithium miners and producers in China continue to expand capacity and hunt for new reserves.

What is a lithium grade?

Lithium grades refer to the purity of the lithium compounds. The specific grade required can vary significantly depending on the end use. Lithium Carbonate 99.5%: Battery Grade, essential for lithium-ion batteries in EVs and portable electronics.

What is lithium used for in batteries?

Lithium is a silver-white light metal. Lithium hydroxide is used in batteries for electrical vehicles and mobile phones. Trading Economics provides Lithium pricing based on spot prices for Lithium Carbonate, 99.5% Li₂CO₃ min, battery grade, traded in China.
