

Battery original production commitment letter

Who is a battery producer?

A battery producer is defined by the regulation as an importer, manufacturer, distributor, or other legal person that either: a. Is established in the EU, and manufactures batteries in the EU under its own name b. Is established in the EU, and has batteries manufactured under its own name to sell them in the EU c.

What is extended producer responsibility for batteries?

Extended producer responsibility for batteries refers to the obligations that battery producers - with the help of their chosen producer responsibility organisation - should fulfil to comply with the requirements set by the Batteries Regulation.

What is a battery producer responsibility?

Specifically, battery producers have a responsibility to finance the collection, recovery, treatment and management of waste batteries. They also must comply with registration and reporting requirements. They can enlist a producer responsibility organisation to help them with these obligations.

How to ensure a warranty on a battery?

To ensure the warranty, the DC current on battery side must not exceed the maximal allowed current of the system type in any moment. method, while the ambient temperature is between 25~ 28°C. Discharge the battery with constant current until the battery reaches End of Discharge Voltage (EODV) or its self-protective voltage. Wait for 10mins.

Who is subject to Article 3 of the EU Battery law?

According to Article 3, battery producers based in country outside the EU and who sell batteries online to consumers are subject to the same requirements as EU-based importers and manufacturers.

Do you need a battery waste management company?

In practice, meeting these obligations tends to require the appointment of a battery waste management company. These are also referred to as producer responsibility organisations or PROs. These are companies that help you manage the physical waste management, in addition to registration, reporting, and the payment of fees.
