To help you out, we have created a mix of 7 heaters that serve as the best battery-operated heater alternatives. It contains 3 + 2 + 2 recommendations for portable propane heaters (for camping, room heating), big propane heaters (for home heating), and power station/generator + electric heater combos (camping, room heating).

If you search online, you won't find many companies or brands advertising a true battery powered electric kettle that you can bring camping, and there is a reason - batteries are not great at storing a large amount of power. If you want to heat a single cup of water (230ml) from room temperature (25 °C) to boiling (100 °C), you will need around 20 Wh of power.
