Will Europe re-shoring the lithium-ion battery supply chain?

While the lithium-ion battery supply chain will likely remain Chinese-dominated until 2030, a European CRM supply security policy and other global supply diversification policies are picking up. Re-shoring activities create opportunities for Europe to strengthen the resilience of its lithium supply chain and to become more self-sufficient.

What role do lithium-ion batteries play in Europe's Energy Evolution?

Dive into the heartbeat of Europe's energy evolution. Our report unveils the pivotal role lithium-ion batteries play in propelling Europe towards carbon neutrality by 2050. Explore the hurdles and successes in developing a European battery value chain, with a focus on sustainability and reliability.

Is Europe a hub for a resilient battery value chain?

Join us in dissecting the current state and untapped opportunities, forging a path to a sustainable and efficient future. Europe stands at the forefront of battery innovation, leveraging political stability, access to capital, and skilled labor. Explore the foundational elements that position Europe as a hub for a resilient battery value chain.

Can a thriving battery value chain drive economic growth?

Witness how a thriving battery value chain acts as a catalyst for economic growth in the European region. Discover the untapped potential that lies within the local strengths and expertise, presenting opportunities for industry stakeholders and aspiring candidates.
