

Cape Town New Energy Battery Installation

What is a residential solar battery system in Cape Town?

A Residential Solar Battery System in Cape Town enables you to operate independently from the grid for 6 to 8 months of the year. It consists of Solar Panels, an Inverter and a Lithium Battery.

How much does solar power cost in Cape Town?

Solar Power in Cape Town is not expensive. 1kWp of Solar Power, without using Batteries, can be installed and registered for as little as R29,000.00 incl. VAT with Treetops. Project Success Story!

How to install solar panels in Cape Town?

The installation of Solar Panels in Cape Town is depending on the type of roof you have. Roof tiles are generally the most expensive structures to mount Solar Panels to, while metal roofs have proven to be the fastest and cheapest. The number of Solar Panels is directly correlating to your Electricity Usage.

Does treetops offer solar system financing in Cape Town?

Treetops offers Solar System Finance (also PV Renting) in Cape Town. For now our offering is limited to commercial, industrial and agricultural clients. However, we are actively pursuing possibilities to offer an affordable financing option for Homes and Houses, to enable everyone to benefit from Solar Power in Cape Town.

Where is solar power located in South Africa?

Based in the picturesque Helderberg region, we proudly serve the entire Western Cape and we are also willing to travel to other areas to bring the power of the sun to your doorstep. Why Solar Power? Solar power is the key to overcoming South Africa's energy challenges.

Is solar power a good source of energy for South Africa?

As a result, we have frequent load shedding, leaving homes and businesses in the dark and causing disruptions across various industries. But there is a solution: solar power. Harnessing the abundant energy of the sun, solar power offers numerous benefits that make it an ideal source of energy for South Africa.
