

# Cheap Solar Power System Price

How much do solar panels cost?

Finding the lowest possible price tag for your solar panel installation might sound like the best way to save money when you go solar, but the payback period of your solar panel system might take twice as long, and your panels may never earn the return you expected. In 2024, the average cost of solar panels is around \$2.86/W before incentives.

What are the cheapest solar panels per watt?

At just \$2.36 per watt, AXITEC offers the cheapest solar panels per watt on our list. The German manufacturer offers average warranties and isn't a top performer in terms of performance or resiliency, but AXITEC panels can be a great way to go solar on a budget.

What are the best Cheap solar panels for residential use?

SunPower is consistently one of our top picks for solar companies overall, and we found the Maxeon X-Series to be one of the best cheap panels for residential use. SunPower guarantees its X-Series panels won't lose more than 8% of their power production over 25 years, and its 25-year warranty covers panel equipment and power.

How much does a rooftop solar system cost?

Mounting system: This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt. Electrical wiring and hardware: This includes the wiring, switches and circuit breakers required to connect the solar panel system to your home's electrical system.

How much does a solar system cost per watt?

Ultimately many factors figure into the price per watt of a solar system, but the average cost is typically as low as \$2.75 per watt. This price will vary if a project requires special adders like ground mounting, a main panel upgrade, an EV charger, etc.

Should you buy cheap solar panels?

These warranty terms are pretty average, which makes sense considering the low price. But, the company still checks off all the boxes for being a reliable brand. LONGi is an excellent example of how buying cheap solar panels can still mean buying good solar panels.
