

What is a Chinese-style solar greenhouse?

A Chinese-style solar greenhouse is an important tool for season extension in specialty crop production in China (Figure 1 and 2). It is similar to high tunnels and is featured by supporting north walls. The north walls are essential in maintaining temperatures inside the structure.

What is solar greenhouse design?

Solar greenhouse design - and passive solar design in general - relies on the premise of strategically controlling light and heat gain. Namely, you want to maximize light when it is absolutely needed (the winter) and reduce light when it is abundant and creates too much heat (the summer).

Who is Weifang Kunsheng agriculture technology?
