How do I choose the right Solar System?

The right solar system is a unique choice for each household. By following the steps outlined above, starting with determining your total electricity requirements, you can tailor the perfect solar setup for your needs (and your budget.) Don't forget to check for government tax breaks and incentives for switching to solar in your location!

How do I choose a solar panel?

When selecting a solar panel, consider your available space, the surface you'll be mounting it on, and whether you want a portable or permanent installation. Then move on to determining how many panels and what rated power and efficiency they need to meet your electricity consumption needs.

How do I choose a solar installer?

Your installer is one of the most important factors in your solar installation! When you choose a solar installer, you should review their certifications, licenses, track record, and reputation in the market.

How do I choose a black solar panel?

Choosing a black frame can enhance the look of your system greatly. You may be interested in getting "all black" panels, where the frame, backsheet, and cells are all the same black color. When choosing a solar panel brand, be careful to make sure that the company you choose will still be around to honor your warranty.

How do I get a great deal on solar panels?

The best way to get a great deal on your solar panel system is to compare quotes based on cost, equipment, and installer reputation. Historically, many solar shoppers only received one solar quote from a door-to-door salesperson or a cold call. But how can you feel confident in your solar decision if you only see one quote?

Should you switch to a solar system?

One of the most significant advantages of switching is cutting your electricity costs. Once you save enough money to offset the cost of your solar system, your solar payback period will be over, and all of that will go right into your pocket! You'll get the best return on your investment by maintaining and upkeeping your system correctly.
