

# City battery cabinet installation requirements and specifications

What temperature should a battery cabinet be protected from?

The battery cabinet should always be protected from the outside weather and sunshine. In order to maximize battery service life time, the recommended operating temperature range is from +20 to +25 °C. Hydrogen and oxygen gases are emitted from batteries into the surrounding atmosphere during charge, float charge, heavy discharge, and overcharge.

How do I install a VDC battery cabinet?

Set first battery in cabinet and attach the long lead (fast-on connector side marked positive) from the cabinet to the fast-on terminal on the positive terminal of the battery. See Figure 24. Facing left Facing right Facing left Vertiv(TM) NetSure(TM) 211 SERIES -48 VDC Battery Cabinet Installation & User Manual (Section 6023) Rev. L 23 Figure 24:

How many battery cabinets are available for the 93pm and 93e?

For the 93PM and 93E product lines, there are two different battery cabinets: Small and Large Battery Cabinet. The battery block configuration in the chosen battery cabinet must always match the UPS requirement. Used battery configuration must be inserted into UPS settings during commissioning or start-up.

How do I connect a battery cabinet to a power system?

Procedure 1. Furnished with the battery cabinet are battery disconnect circuit breaker alarm lead assemblies. Refer to the power system installation manual to use these alarm leads to connect the battery cabinet battery disconnect circuit breaker alarm into the power system alarm circuits.

How do you put a 4th Battery in a cabinet?

Place another inner battery spacer next to the third battery. 9. Set fourth battery in cabinet (being careful of the door fastener tabs hanging down) and attach the other end of the fast-on lugged cable to the negative terminal on the third battery (fast-on terminal).

What if the battery cabinet is too dusty?

Excessive amount of dust in the operating environment of the battery cabinet may cause damage or lead to malfunction. The battery cabinet should always be protected from the outside weather and sunshine. In order to maximize battery service life time, the recommended operating temperature range is from +20 to +25 °C.
