

TLS Offshore Containers International designs and produces lab containers, crane containers, workshop containers, rigging loft containers, ROV control containers, and more, all built to customer specifications and compliant with standards such as DNV 2.7-1, NORSOK, and ATEX/IECEEx, including SOLAS/IMO regulatory requirements. Our functional containers are ...

In the wake of multiple once-in-a-lifetime energy shocks, there has never been a more important time for the conversations and connections that will secure new possibilities of ...

We also have the capacity to receive bulk cargo of 250,000 tonnes per year, container and project cargo. Altogether, we have created a critical hub which connects to busy maritime routes and offers the possibility of accessing fluvial routes (the Magdalena River), and all of this with a favourable draft to manage bulk and large ...

This report summarises a workshop held by Colombian and UK partners on April 26, 2024, in Bogotá, Colombia. The workshop aimed to understand the barriers and opportunities to increasing access to sustainable energy in Colombia, focusing on including marginalised voices and adopting a systems approach to enhance outcomes. The event followed a ...

We also have the capacity to receive bulk cargo of 250,000 tonnes per year, container and project cargo. Altogether, we have created a critical hub which connects to busy ...

In the wake of multiple once-in-a-lifetime energy shocks, there has never been a more important time for the conversations and connections that will secure new possibilities of better energy. The 26th World Energy Congress will explore the role of connected energy societies in driving forward global energy transitions in today's less ...

The study "Power-to-X Colombia" provides a comprehensive analysis of suitable regions in Colombia for large-scale onshore wind and solar PV parks and for the production of Power-to ...

Energy storage is a "force multiplier" for carbon-free energy. It allows for the integration of more solar, wind and distributed energy resources, and increases the capacity factor of existing plants to avoid the need for new thermal generation. AES's contributions in energy storage have enabled hundreds of utilities worldwide to reduce ...

The study "Power-to-X Colombia" provides a comprehensive analysis of suitable regions in Colombia for large-scale onshore wind and solar PV parks and for the production of Power-to-X (PtX) energy carriers such as gaseous and liquid hydrogen as well as ammonia and methanol.

This report summarises a workshop held by Colombian and UK partners on April 26, 2024, in Bogotá, Colombia. The workshop aimed to understand the barriers and opportunities to ...

This report summarises a workshop held by Colombian and UK partners on 26 April 2024 in Bogotá, Colombia. The workshop aimed to understand the barriers and opportunities to ...

Local generation and (export) supply costs (incl. long distance transport) of liquid hydrogen, ammonia and methanol for selected sites, potential analysis for renewable electricity ...

In this article, we will explore the incredible potential of energy storage containers and their diverse applications that go beyond traditional energy storage. 1. Renewable Energy Integration: One of the primary applications of energy storage containers is in the integration of renewable energy sources, such as solar and wind power, into the ...

Battery Energy Storage System (BESS) containers are increasingly being used to store renewable energy generated from wind and solar power. These containers can store the energy produced during peak production times and release it during periods of peak demand, making renewable energy more reliable and consistent.
