The tests are tough by design. We charge and discharge the batteries thousands of times while in a 167º F water bath to simulate underhood temperatures and find out how long they'll last.

A battery with a higher capacity will last longer between charges, but it may also be heavier and more expensive. Size And Shape. The size and shape of the battery must match that of the tool's battery compartment. Battery packs that are too large or too small for the tool will not fit properly and can damage the tool or the battery.
