Global Petro Storage (GPS) and Port of Amsterdam have entered an agreement to develop a railcar connection on the land located adjacent to GPS's existing 11-tank gasoline and bioguel storage and blending facility. GPS intends to develop a rail connection to the public network and to points across Europe that will increase its efficiency and offerings to clients.

Across North West Europe, cities are increasingly investing in renewable energy production and charging infrastructure for electric vehicles. However, the control systems for energy generation, energy utilisation, energy storage and electric vehicle charging work are currently separate from each other. This results in high costs and CO2 ...
