What is a monolithic capacitor?

Monolithic capacitor is another name for multilayer ceramic capacitor. The English name is monolithic ceramic capacitor or multi-layer ceramic capacitor, or MLCC for short, which is widely used in electronic precision instruments. Various small electronic devices are used for resonance, coupling, filtering and bypass.

How can a recycler take advantage of a monolithic ceramic capacitor?

Two alternatives exist for the recycler to take advantage of the Palladium content of monolithic ceramic capacitors. The first alternative comprises selling e-scrap circuit boards to board processors or arranging a sort of assay process. The second alternative is for the recycler to process the circuit boards.
