The TES is mainly classified into the sensible, the latent, and the thermochemical energy storage. The sensible thermal energy storage (STES) system, which stores energy by changing temperatures of the storage medium, is considered as a mature technology installed in commercial concentrating solar power plants, e.g.,

In the field of battery energy storage, CATL battery systems cover ternary lithium-ion batteries and lithium iron phosphate batteries, which are widely used in new energy vehicles, electric mobility vehicles and energy storage systems, showing strong market adaptability and technical strength. From 162.30GWh in 2021 to
