Introduction: Guinea-Bissau, a coastal nation in West Africa, is embarking on a journey towards sustainable energy solutions to address energy access challenges and promote economic development. In recent years, residential renewables have emerged as a promising avenue for households seeking clean, reliable, and affordable energy sources. This article ...

In Guinea Bissau, the power purchaser EAGB has signed two PPAs so far: the first with the Karpowership company for a 30 MW HFO power barge, and the second with Electricité de Guinée (EDG), the national public electric utility of Guinea, for importing power through the OMVG transmission line by 2022. In both cases, EAGB had external technical and ...

A 30 MW solar power plant will be developed near the capital, Bissau, to reduce electricity costs and diversify the energy mix. Battery storage will initially help stabilize the power supply and later offer additional services to the electricity system, according to the Ministry of the Economy, Planning, and Regional Integration of Guinea-Bissau.
