Energy Storage: In 2023, prices of lithium carbonate and silicon materials have fallen, leading to lower prices of battery packs and photovoltaic components, which means a reduction in the cost of developing energy storage businesses.

Benchmark and data visualization of HK public listed companies in the Solar Industry, with top companies, stocks performance comparison, competitive analysis, and comparisons of top companies for market research.

I don't think battery storage is a one-technology-takes-all market. I think there is room, as it's too big a market and there are too many different applications of energy storage, for at least two, if not five to eight different core technologies to have roles in the energy transition. Ken-Ichi Hino, Portfolio Manager - Energy Storage
