

How are batteries classified in the invoicing system

What should a battery invoice include?

Additionally, the invoice should feature the Harmonized System of Nomenclature (HSN) code assigned to batteries for standardized classification and ease of identification. The GST rates on batteries are subject to change and manufacturers should regularly verify and stay updated with the latest applicable rates.

What is the classification code for an invoice?

Each classification code in this table corresponds to a specific invoice type. For instance, INV-PRO-001 represents a proforma invoice, while INV-COM-002 indicates a commercial invoice. These codes provide a quick reference to the type of invoice being processed.

What are the different types of invoices?

To begin, you should familiarize yourself with the different types of invoices and their corresponding classification codes. For instance, a proforma invoice is classified as INV001, while a credit memo is classified as CM002.

What is an invoice code?

An invoice code is a distinct type of code assigned to an invoice. Each code represents the purpose and characteristics of the invoice, such as a proforma invoice, commercial invoice, credit memo, debit memo, timesheet invoice, or recurring invoice.

What are IV-pro-001 & NV-com-002 invoice classification codes?

For instance, INV-PRO-001 represents a proforma invoice, while INV-COM-002 indicates a commercial invoice. These codes provide a quick reference to the type of invoice being processed. Understanding classification codes is essential for efficient invoice management.

What is a preliminary invoice?

A preliminary invoice is a type of invoice typically used in international trade, especially when dealing with customs or when a customer wants to know the cost of a potential purchase before committing to it. It provides a detailed breakdown of the products or services, their quantities, and prices.

The EIS, short for e-invoicing system, is currently in a pilot phase with only 100 top taxpayers mandated to use it, and that too only for B2G invoices.
