

How big a mobile power bank should I use for a 5000ma battery

How much Mah does a power bank need?

The ideal mAh for your power bank depends on the phone battery capacity. The larger the phone battery capacity, the larger the battery of a power bank should be. A 15000-20000mAh power bank should be fine. But, that's an easy answer. We have explained how much mAh your power bank needs for different devices. Let's dive in.

What is a 5000 mAh power bank?

Both the 5000mAh and 10000mAh power banks in the Benks ArmorGo series are equipped with fast-charging technology, allowing you to quickly recharge your devices and get back to your activities without long wait times. The Benks ArmorGo 5000mAh power bank is designed for those who need a compact and efficient charging solution.

What size power bank should I buy?

Mid-sized power banks are usually around the 25,000-30,000mAh range. These are portable enough to not weigh down your backpack when carrying it, but also hefty enough to provide enough power to last hours on end. ChargeTech's 27,000mAh power bank is a sleek, elegant option for those looking for a solid in-between.

How long does a 5000 mAh power bank take to charge?

A lot of power banks are marketed with huge mAh numbers, but, in reality, the power banks are very small and can be fully charged in one or two hours. 5000mAh Power Bank is not that kind of product. It has high mAh number, but it takes a while to charge it and it takes a while to charge your device.

Is a 5005mAh power bank a good choice?

The 5005mAh power bank also has a high capacity of 5,000mAh but can only hold up to 3 charges for iPhone 5 and 1 charge for iPad mini. Power banks with lower mAh numbers may not be able to provide as much charge as those with higher mAh numbers but they are still good options if you're looking for something small and portable.

Which power bank should I buy?

ChargeTech's new 730-C, a 30,000 mAh power bank, is also an excellent option if you do not need the AC outlet. If you need a higher capacity power source for a longer period of time, a portable power bank with a large mAh such as 54,000 mAh is the safest bet.

Mid-sized power banks are usually around the 25,000-30,000mAh range. These are portable ...

The ideal mAh for your power bank depends on the phone battery capacity. The larger the phone battery capacity, the larger the battery of a power bank should be. A 15000-20000mAh power bank should be fine.
