

How much do you want to invest in the energy storage industry

Is energy storage a good investment?

Energy storage is an attractive emerging high-growth sector. It's still wide open with many upcoming companies. The market has seen more pure energy storage players coming online with different technologies. These are often high-risk, high-reward investments. ESS (energy storage solutions) offers a compelling new segment in renewable energy.

Who needs energy storage?

Large energy consumers ranging from factories to large campuses need this type of storage in spades. The US armed forces has been a leader in the development of micro-grid and standalone energy systems.

Which energy storage stocks are a good investment?

Albemarle is the top holding, followed by Tesla, so if you can't decide from the previous stocks, this fund is a good one-stop investment to play the pending energy storage boom. With more than \$1 billion under management and about 60 components, this First Trust fund is another interesting and diversified way to play energy storage.

Why is the demand for energy storage increasing?

The demand for storage is increasing massively. Electrification is here to stay and after a period of flat-to-declining consumption (driven in part by energy efficiency tools from LED bulbs, to heat pumps, to smart thermostats & much more), the demand for electrons is going to rise as vehicles and other users of CO₂ generating fuel convert.

Why is energy storage important?

For individual customers like companies and homeowners, it also offers the certainty of backup when the grid fails. The grid won't switch to 100% renewable energy soon, but energy storage ensures an immense amount of renewables than today is possible.

What are the future opportunities for energy storage?

Energy storage is a fast-emerging sector. Pumped hydro is the most used solution for now. Batteries are the next step to support renewable energy. Lithium technologies lead the way, but many upcoming technologies have different benefits. I provide an overview of possible opportunities.
