There is a point in the transfer switch that gets battery voltage when the generator is placed in "auto" mode. From there, I could power the ESP32 (via a 3.3v stepdown) and also monitor the battery voltage for over or under voltage (via a 5x divider). I also tapped into one of the main legs that gives 120v when the generator is ...

With a whole home battery backup system, you can power your home and essential appliances, relieving you of the stress of blackouts. It also reduces reliance on the power grid, and when paired with solar panels, it absorbs clean, renewable energy from the sun.
