

How to adjust the time of solar power supply tube video

How do you stop a solar panel from turning on at night?

A quick and easy test is to trick them into thinking it's night by covering the solar panels. Grab a dark cloth or a piece of cardboard and cover the solar panel completely. You want to block all the light--like it's the middle of the night. No peeks of light should get through, because even a sliver might keep them from switching on.

How do I access the solar charger settings?

To access the solar charger settings, navigate to the settings page. Do this by clicking on the cog icon at the top right of the home screen. The settings page provides access to view and/or to change the solar charger settings. For information about each setting and how to update firmware see the Updating firmware chapter. 5.1.2.

Can I change solar charger settings?

The solar charger settings can be configured so it can be tailored specifically for the system it is used in. Do not change solar charger settings unless you know what they are and what the effect of changing these settings is going to be. Incorrect settings may cause system problems including damage to batteries.

How long can a solar charger spend in the absorption stage?

Enter the maximum time in hours and minutes (hh:mm) the solar charger is allowed to spend in the absorption stage. The maximum time that can be set is 12 hours and 59 minutes. Float voltage This setting sets the float voltage. Re-bulk voltage offset This setting sets the re-bulk voltage offset.

How do I Reset my solar charger?

Update the firmware. On the settings page, click on the three vertical dots in the upper right corner and select "Reset to defaults" from the drop-down menu. Un-power the solar charger within 10 seconds. The next time that the unit is powered up, it will perform the initial automatic voltage detection.

When is it time to reset a solar panel?

Here's a handy rundown to help you figure out when it might be time to hit the reset button: Lights Aren't Working: First up, if your solar lights just aren't lighting up, there could be a blockage. Dirt or debris might be covering the solar panels, preventing them from charging.
