

How to check the model of battery pack

How do I know what size a Tesla battery pack is?

Each Tesla battery pack should include a parts label that may be read to help estimate its size. Some models have stickers that prominently display the pack size. On the Model S, the Tesla battery pack size sticker should be on the inside of the wheel well behind the front passenger wheel.

What is a battery pack serial number?

The serial number is a unique identifier for a Lithium-ion Battery Pack. There is only one battery pack with any assigned serial number. The Flux Power product support team can use the serial number to determine information about the battery pack that the operator is using.

What is the voltage of a Lithium-ion battery pack?

The voltage of a Lithium-ion battery pack is determined by the number of cells and their connection (series or parallel). This is a measure of the charge stored by the battery. Assuming the battery pack is fully charged, the capacity is analogous to the 'fuel tank' size of a vehicle.

Where can I Find my Tesla battery pack information?

Information about your Tesla battery pack can be found on a sticker affixed to the front right side of the battery pack. This label, which can be seen when looking under your car from just behind the front right (passenger side) wheel, indicates the size of your battery pack in the top portion.

How do I know if my Tesla has a battery?

However, on model 3 and model Y, it is much more difficult to find information about the Tesla battery as you would need to take a picture of the vehicle's undercarriage to find out. Another way to find your Tesla's battery type is through a Tesla Service Center Technician.

How do you know if a Tesla battery pack is refurbished?

According to the TMC Wiki, the part numbers of Tesla's basic battery packs can indicate if a pack is refurbished or factory new. There's a large variation of part numbers which may contain notable differences that the community has yet to identify. Or it may simply be an indicator for a refurbished pack.

* On certain battery packs the battery part number is printed in small lettering. The battery part number will begin with (G71C*****) and is located on a barcode label to the left or bottom of the barcode. If you are unable to read the battery part number you can download our Battery Check Utility by clicking the link at the top of this page ...

First how or where do I look on the car to see what version/model# battery pack is on a brand new S that got delivered yesterday. Is there a wiki somewhere that keeps track of the different model/version types of battery packs/versions that have come out? Any help would be appreciated. TIA!
