How do you install solar panels on a roof?

Start with a solid foundation, which is essential to add solar panels to a roof or a ground platform. For roof installation, lag bolts are attached to the rafters, and a piece of flashing is used on top of the shingles to prevent leaks. The flashing slides under the shingle wherever a lag bolt installation occurs.

How do solar panels connect to a roof?

In short, the solar panels connect to a roof-mounted frame. The solar panels sit on the frame and are clamped with either a bolt, bracket, or other clamping devices. If you are using a kit, the clamps will match the frame making it easy to secure the panels to the roof.
