

How to remove the Nubia battery

What should I do if my Nubia phone battery explodes?

You should fully charge the battery as soon as possible. Warnings: Use only Nubia-approved chargers and USB Type-C cables. The use of o unapproved accessories could damage your phone or cause the battery to explode. Power On/Off the Phone Make sure the battery is charged before powering on. Press and hold the Power button to turn on your phone.

How do you remove a battery from a phone?

For phones with sealed batteries,the process is slightly more complicated. A small slit will need to be made in the back of the phone in order to access the battery. To do this,use a small knife or razor blade to make a small incision in the back of the phone. Once the incision is made,the battery can be carefully removed from the device.

What is the specs of ZTE Nubia Z11?

ZTE Nubia Z11 smartphone was launched in June 2016. The phone comes with a 5.50-inch touch display with a resolution of 1920*1080 pixels. ZTE Nubia Z11 is powered by 2.15GHz quad-core Qualcomm Snapdragon 820 processor and it comes with 4GB of RAM. The phone packs 64GB of internal storage that can be expanded up to 200GB via a microSD card.

The nubia Z60S Pro is equipped with a powerful 5100mAh battery and 80W fast charging capabilities, ensuring longer use without the need for frequent recharging. If you're attending a music festival or stuck on a bus for hours, nubia has got your back. Its 6.78-inch 1.5K AMOLED display, combined with a 120Hz refresh rate and eye-safe ...

3. Disconnect the charger when the battery is fully charged. NOTE: If the battery is extremely low, you may be unable to power on the phone even when it is being charged. In this case, try again after charging the phone for at least 20 minutes. Contact the customer service if you still cannot power on the phone after prolonged charging.

Locate the battery and identify the positive and negative terminals. The battery will be a big block with cables coming out of it. Typically the terminals are covered with plastic caps that make it really easy to tell the terminals apart--the positive terminal is covered with a red cap and the negative terminal has a black cap. If the plastic caps are no longer there, look for ...
