How do you replace a negative battery cable?

Run the new negative cable back through the engine bay in the same route the old one took. Use a flashlight to ensure neither cable is coming into contact with any belts. Belts spin at high speeds under the engine bay and can damage battery cables. Place the battery back in the car.

How to clean and replace battery cable terminal ends?

Place the battery cable terminals over the battery post and tighten them firmly. Never force the terminal onto the post with a hammer. If it's too tight, gently spread the terminal to fit it onto the post. That concludes our guide on cleaning and replacing battery cable terminal ends.

How do I replace a battery terminal?

If you're replacing a terminal, follow these steps: First, disconnect the grounded battery cable before replacing the terminal on either cable. Then, remove the old terminal by cutting or sawing as close to the cable's terminal as possible. Next, strip approximately 3/4 of an inch of cable insulation from the cable end.

How do you attach a battery to a car battery?

Bolt the bracket that holds the battery back into place to secure the battery. Be sure you placed the battery back in the same way it was before you took it out, so the positive terminal is closer to the positive cable, and the negative terminal is closer to the negative cable. Connect the positive battery cable to the battery.

How do you remove a battery from a car?

Set the end of the cable aside so that it can't fall back into place and make contact with either battery terminal. If your battery is in the trunk, the positive cable will attach to another connector near the body of the car. Simply disconnect it from there. Remove the battery.

How do you connect a battery post to a car?

Now, clean the battery post, and remember that the ground cable should be connected last. Place the battery cable terminals over the battery post and tighten them firmly. Never force the terminal onto the post with a hammer. If it's too tight, gently spread the terminal to fit it onto the post.
