

How to replace the battery of Asian fire control cabinet

How do I install a fire alarm battery cabinet?

The BC-1(R) provides an internal terminal assembly for wiring the batteries to the fire alarm control panel power supply terminals. Install the battery cabinet in accordance with CAN/ULC-S524 Installation of Fire Alarm Systems. Install the battery cabinet in the same room as the fire alarm control panel.

How do I install a battery cabinet?

Install the battery cabinet in the same room as the fire alarm control panel. We recommend the space between the cabinet and the panel be 3 in. (7.6 cm) minimum and 10 ft. (3.4 m) maximum. Run battery wiring in conduit or equivalent protection against mechanical injury. Refer to Figure 4 for BC-1(R) cabinet dimensions.

How do you mount a BC-1(R) cabinet?

Refer to Figure 4 for BC-1(R) cabinet dimensions. Attach the wall box to the wall using the mounting holes on the back of the wall box. See Figure 1. Use fasteners that can support the full weight of the cabinet, including the batteries.

What if the battery cabinet is too dusty?

Excessive amount of dust in the operating environment of the battery cabinet may cause damage or lead to malfunction. The battery cabinet should always be protected from the outside weather and sunshine. In order to maximize battery service life time, the recommended operating temperature range is from +20 to +25 oC.

How many battery cabinets are available for the 93pm and 93e?

For the 93PM and 93E product lines, there are two different battery cabinets: Small and Large Battery Cabinet. The battery block configuration in the chosen battery cabinet must always match the UPS requirement. Used battery configuration must be inserted into UPS settings during commissioning or start-up.

Install the battery cabinet according to the installation drawings provided. Install the battery cabinet using adjustable leveling legs to ensure the cabinet is level and stable.
