A large number of lithium iron phosphate (LiFePO 4) batteries are retired from electric vehicles every year. The remaining capacity of these retired batteries can still be used. Therefore, this paper applies 17 retired LiFePO 4 batteries to the microgrid, and designs a grid-connected photovoltaic-energy storage microgrid (PV-ESM). PV-ESM was built in office ...

Thermal runaway propagation (TRP) of lithium iron phosphate batteries (LFP) has become a key technical problem due to its risk of causing large-scale fire accidents. This work systematically investigates the TRP behavior of 280 Ah LFP batteries with different SOCs through experiments. Three different SOCs including 40 %, 80 %, and 100 % are chosen. In addition ...
