

Latest ranking of domestic battery pack brands

Who makes the best battery?

This was driven by demand from its own models and growth in third-party deals, including providing batteries for the made-in-Germany Tesla Model Y, Toyota bZ3, Changan UNI-V, Venucia V-Online, as well as several Haval and FAW models. The top three battery makers (CATL, BYD, LG) collectively account for two-thirds (66%) of total battery deployment.

Who is the largest battery company in the world?

Contemporary Amperex Technology Co. Limited (CATL) has swiftly risen in less than a decade to claim the title of the largest global battery group. The Chinese company now has a 34% share of the market and supplies batteries to a range of made-in-China vehicles, including the Tesla Model Y, SAIC's MG4/Mulan, and Li Auto models.

Which battery maker has the most competitive EV product?

Still, the top three battery makers are responsible for two thirds (66%) of the total battery deployment, which highlights the importance of scale in this business, in order to have the most competitive product on the market. Panasonic, once upon a time a leader in the automotive EV business, has continued its slow slide down the table.

Which country produces the most battery?

Chinese giant Contemporary Amperex Technology Co., Limited (CATL) alone is forecasted to produce more than the combined output from Canada, France, Hungary, Germany, and the UK. Currently, China is home to six of the world's 10 biggest battery makers.

Is Panasonic losing its competitive edge in the EV battery industry?

Once a leader in the EV battery business, Panasonic now holds the fourth position with an 8% market share, down from 9% last year. With its main client, Tesla, now effectively sourcing batteries from multiple suppliers, the Japanese battery maker seems to be losing its competitive edge in the industry.

Is Sunwoda a good battery supplier?

Finally, Sunwoda is greatly benefitting from the growth of the startup Leap Motor, which it is the main battery supplier for. With the EV market continuing to grow fast, and average battery size increasing, expect the battery market to continue growing even faster, with +/-50% growth rates likely in the next couple of years.

The automotive landscape is changing rapidly and with lead times and electric vehicle (EV) innovation being key factors in meeting sustainable demand, these 10 battery manufacturers are supporting this global transition.
