

How to care for a lithium ion battery?

Ensure adequate and secure mounting and always use suitable handling equipment for transportation. Handle with care because a li-ion battery is sensitive to mechanical shock. Do not use a damaged battery. Do not wet the battery. 1.2. Charge and discharge warnings Too deep discharges will seriously damage a li-ion battery and can even be dangerous.

How do I charge a lithium battery?

This is due to the different number of cells. Use a battery charger suitable for lithium batteries, such as a Blue Smart charger. Set the charger to the charge profile as indicated in the above table. The supervisor connects with the VictronConnect app to the battery. The supervisor monitors the individual cell voltages at all times.

How do I transport a lithium battery?

Cartons or crates used to transport lithium batteries must have an approved warning label affixed. Air transportation of lithium batteries is prohibited. Do not stand below a battery when it is hoisted. Never lift the battery at the terminals or the BMS communication cables; only lift the battery at the handles.

How does the Smart lithium battery management system work?

Battery Management System The battery cells in the Smart Lithium batteries are protected against over-charge, under-charge, charging at too low temperatures as well as charging at too high temperatures. As part of the protection the battery has an integrated Balancing, Temperature and Voltage control system, the BTV.

How do I charge a lithium battery with a BMS 12/200?

The alternator port of a BMS 12/200. Add a DC/DC converter or charger. For more information on charging lithium battery with an alternator, see the Alternator lithium charging blog and video.

Can I connect a ve direct cable to a lithium battery?

It is not possible to connect a VE.Direct cable (or any other communication cables) to the battery. The VE.Direct to USB interface can also not be used. This also rules out the Windows version of the VictronConnect App, as the Windows version of the app does not support Bluetooth. A GX device can also not be used to connect to the lithium battery.

Fortress Lithium Battery is safe, easy to install, consistently reliable, highly efficient. It provides you the lowest lifetime energy cost. This installation manual contains information concerning ...

Thank you for choosing a Li600 Lithium Material Handling Battery. This battery system is completely self-contained and can be used as a direct replacement for the most current in-use lead acid and lithium-ion systems. Scope of supply The following parts are included: o Li600 Lithium Material Handling Battery

techniques when installing or removing batteries. o If involved in a vehicle accident, they can become a projectile! Ensure adequate and secure mounting and always use suitable handling equipment for transportation. o Handle with care because a lithium battery is sensitive to mechanical shock. o Do not use a damaged battery.

Use battery cables with a cross-sectional area that matches the currents that can be expected in the battery system. Batteries can produce very large currents; it is essential that all electrical connections to the battery are fused.

Circuit Protection: The battery includes a BMS (Battery Management System) to protect the battery from overcharging, over-discharging, over drain, and short circuit, resulting in overall longer battery life. The BMS also protects the battery from exploding and catching fire. Includes thermal safety fusing, cell balancing, CID and fault recovery. Bluetooth monitoring available. 4 ...
