Are lithium RV batteries worth it?

The reality of lithium RV batteries is that they are a worthwhile investment if you like to dry camp, boondocking, and planning for long-term RV living & traveling. Consider that the average lead-acid battery is rated for about 400 charge-discharge cycles, and that's the high end.

How much does an RV battery cost?

By contrast, the average cost of an RV lithium battery in today's market can easily exceed \$1300. If you are looking at initial cost alone, lead-acid batteries are still the way to go. But consider this: The average life span of a lead-acid battery is about five years while lithium RV batteries can last up to 10 times longer.

What type of lithium battery for RV use?

The most common type of lithium battery for RV use is the lithium iron phosphate battery (which you will often see advertised as 'LiFePO4'). In these batteries, the metal plate on the positive terminal is made of lithium-based metal oxide. The plate on the negative terminal is usually made of graphite.
