What is a Maplin plus 12V 7AH lithium iron phosphate LiFePO4 battery used for?

Maplin's Plus 12V 7Ah Lithium Iron Phosphate LiFePO4 Batteries are used for mobility scooters, electric vehicles, standby power applications such as alarm panels, small UPS applications, power backup, powering portable devices, lawn mowers, bait boats, burglar alarms and more.

Why is battery management important for a lithium iron phosphate (LiFePO4) battery system?

Battery management is key when running a lithium iron phosphate (LiFePO4) battery system on board. Victron's user interface gives easy access to essential data and allows for remote troubleshooting.

Are lead-acid batteries better than lithium iron phosphate batteries?

Many still swear by this simple, flooded lead-acid technology, where you can top them up with distilled water every month or so and regularly test the capacity of each cell using a hydrometer. Lead-acid batteries remain cheaper than lithium iron phosphate batteries but they are heavier and take up more room on board.

Can you add a LiFePO4 battery to a lead-acid battery bank?

You could, in theory, simply add an LiFePO4 battery in parallel to an existing lead-acid battery bank, but not without really knowing what you're doing and only if you're prepared to risk alienating your insurer. Battery management is key when running a lithium iron phosphate (LiFePO4) battery system on board.

Are LiFePO4 batteries cobalt free?

LiFePO4 batteries are cobalt free and don't have the high fire risk associated with straight lithium-ion batteries, so are the... Fully charged, a 12.8V LiFePO4 battery has a rested voltage of between 13.3V-13.4V, notably higher than the 12.6-12.7V of a regular lead-acid battery.

How to charge LiFePO4 batteries?

Solar is an ideal method of charging LiFePO4 batteries, particularly for long-term cruisers who spend a lot of time at anchor. You can feed as much power into the bank as the solar panels will produce during their most productive part of the day, only topping up via other methods in the evening if more power is needed.
