How much does home solar cost?

The average pre-incentive cost of home solar is \$29,161 for a three-bedroom house, or \$20,412 after claiming the 30% tax credit. However, as shown in the chart below, the number of bedrooms isn't a great indicator of the size and cost of a solar system - and neither is living space, for that matter.

How much do solar panels cost per square foot?

On average, solar panels cost \$8.77 per square foot of living space, after factoring in the 30% tax credit. However, the cost per square foot varies based on the size of the home. For example, the post-tax credit cost of solar panels for a 2,500-square-foot home is around \$20,000 for a rate of \$7.96 per square foot.

How much does a solar system cost for a 3,000 square foot home?

The average pre-incentive cost of a solar system for a 3,000 square foot home was \$30,100 based on thousands of sales conducted on solar.com in 2022. The number of panels in these systems depends on the price point from the installer and power rating of each panel. The table below shows a few common scenarios for a 3,000 square foot home.

How can I reduce the cost of home solar?

However, non-labor soft costs like permitting, inspection, interconnection, and general overhead make up around half of the cost of home solar. There are a few ways to reduce the cost of going solar. First, research federal, state, and local solar incentives to make sure you're not leaving money on the table.

How much does a 400 watt solar panel cost?

Today's premium monocrystalline solar panels typically cost between \$1 and \$1.50 per Watt, putting the price of a single 400-watt solar panel between \$400 and \$600, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300.

How much does a solar panel mount cost?

The selection of the mounting system for your solar panels can influence the cost per panel, ranging from \$15 to \$750. Here's an overview of the various mount types: Adjustable Mount: Adjustable solar panel mounts provide the flexibility to raise or lower panels for better sunlight exposure. These mounts typically range from \$30 to \$250 per panel.

How much do solar panels cost per square foot of living space? Home solar systems typically range from \$6 to \$12 per square foot of living space. The actual cost may vary based on the size and electricity consumption. These estimates are assuming the homeowner claims the 30% federal tax credit for the solar system.
