

London Energy Storage Equipment Box

Who owns the UK's energy storage projects?

These projects are owned by both private energy storage companies and publicly listed energy storage funds. Kona Energy works with the UK's leading energy storage financiers, equipment suppliers and consultants to develop the UK's optimal battery storage projects. The UK has a legally binding commitment to become net zero by 2050.

What is a battery storage asset?

These flexible assets are key to balancing energy supply and demand and increasing the utilisation of renewable power on the electricity system. Kona Energy are developing a 1000MW portfolio of large scale energy storage projects across the UK. Battery storage assets are used to balance supply and demand on the electricity system.

What is utility scale battery storage?

Utility scale battery storage has a vital role to play in the global energy mix. It provides an answer to one of the biggest challenges faced by renewable generators- the intermittent nature of such technologies - offering a way to capture clean energy and balance energy generation against demand.

Why should you invest in battery storage in the UK?

Develop and own a portfolio of 250MW of Battery Storage in the UK in the next 2-3 years with a further expansion in the next 5-7 years delivering a Battery Storage capacity of 1GW, in-order to contribute to renewable infrastructure growth, and provide attractive financial returns for our investors.

What is epes233 energy storage cabinet?

EPES233 is a 100kW, 233kWh Outdoor Liquid Cooling Energy Storage Cabinet. It offers flexible expansion, long cycle life, and advanced safety features, including intelligent 24/7 cloud monitoring. Perfect for reliable and scalable energy storage in Europe. Interested in our products? Let's connect. Send us an email to epenergy@ep-ep.com

Who is anesco battery storage?

Anesco is the UK market leader for utility scale battery storage. Since installing the country's first commercial energy storage unit back in September 2014, we have connected storage capacity totalling 150MW across 33 sites, with a further 250MW of battery projects currently under construction.

Our Battery Energy Storage Systems (BESS) store excess electricity until sold into the National Grid to meet industrial or domestic electricity demands. Our BESS assets help level out expensive peaks and troughs of electricity pricing caused by supply and demand imbalance.

EPES233 is a 100kW, 233kWh Outdoor Liquid Cooling Energy Storage Cabinet. It offers flexible expansion,
