

Mobile humidifier battery

What is a portable ultrasonic humidifier?

Portable ultrasonic humidifier disperses visible cool mist with 4 adjustable mist settings. Small enough to fit in your car cup holder, it's perfect for personal space. The easy-to-fill 16.2-oz. tank features up to 8 hours of runtime when plugged in and up to 5 hours when using the rechargeable battery. Plus, a built-in warm night light. Feature:

What is a portable room humidifier?

Portable room humidifiers are small but mighty devices that help increase moisture level in the air and raise the humidity, no matter where you are. Not to be confused with an essential oil diffuser, these room humidifiers come in many different forms, depending on your preferences.

How does a portable humidifier work?

Some use a water bottle as a tank, for example, while others have a built-in water reservoir to create water vapor. Most portable humidifiers work using cool mist ultrasonic technology, which uses high-frequency sound vibrations to create water particles that get expelled into the air, raising the air's moisture level.

How long does a HoMedics portable humidifier last?

Sleek and small enough to fit in a backpack, the HoMedics portable humidifier is a favorite for travel thanks to how quiet and small it is. The 8.5-ounce water tank provides 10 hours of runtime when plugged in or 3.5 hours when run on its battery.

Do portable humidifiers really work?

Portable humidifiers combat dry air wherever you are by providing targeted humidity for your personal space. Even on the go, or somewhere like a hotel where you can't really control the environment, you can prevent these negative skin impacts, sleep better, and feel better, all with one little portable device.

Can a portable humidifier help you sleep?

A portable humidifier is an effective and simple way to add the right amount of humidity to your household. It can help balance the exposure you've had to harsh, dry air and adds a delicate amount of moisture to the air in your home. Using a mini humidifier while you sleep could help to alleviate these uncomfortable symptoms, often overnight.
