

Mobile power battery charging does not display

How do I fix a battery not charging on my phone?

Power off your phone and plug in the charger to see if the battery charges. If the battery charges while the device is off, but it stops when you turn it on, restart it in safe mode to rule out any apps that might be causing the issue. This is usually done by simultaneously pressing the power button and the volume up or down button.

Does the battery indicator show charging information while charging a phone?

It does not show charging information while charging the phone and when the always-on display setting is off. Earlier it used to show the battery percentage and the time remaining, even after the always-on display setting is off.

Why is my phone not charging?

Once the phone has rebooted, try plugging it in again to see if it starts charging. Next, one of the simplest fixes you can try if your phone isn't charging is to check the power source. The problem might be with the power outlet itself, so plug another device into the same socket to see if it powers on or charges.

How do I know if my phone battery is fully charged?

To determine if an Android phone battery is fully charged, check that no accessories, like cases or battery packs, cover the sensors or press its buttons. Plug in your phone with a working cable, charger, and outlet, then wait one minute. If you see a battery icon, your phone is powered off and is charging. You can restart it right away. If you see a red light, your battery is fully discharged.
