

# National policy on energy storage development

What are the main goals of new energy storage development?

The main goals of new energy storage development include: Full market development by 2030. 1) Strengthening planning guidance to encourage the diversification of energy storage; 2) Promoting technological progress to expand the energy storage industry system; 3) Improving the policy mechanism to create a healthy market environment;

What are the Development Goals for new energy storage in China?

The plan specified development goals for new energy storage in China, by 2025, new energy storage technologies will step into a large-scale development period and meet the conditions for large-scale commercial applications.

Will energy storage industrialization be a part of the 14th five-year plan?

While looking back on 2020, we also look forward to the development of energy storage industrialization during the 14th Five-year Plan, as policy and market mechanisms become the key to promote the full commercialization and large-scale application of energy storage.

Can China develop energy storage technology and industry development?

Under the direction of the national "Guiding Opinions on Promoting Energy Storage Technology and Industry Development" policy, the development of energy storage in China over the past five years has entered the fast track.

When will new energy storage development be introduced?

The commission said earlier it will introduce a plan for new energy storage development for 2021-25 and beyond, while local energy authorities should also make plans for the scale and project layout of new energy storage systems in their regions.

Will China achieve full market-oriented development of new energy storage by 2030?

The country has vowed to realize the full market-oriented development of new energy storage by 2030, as part of efforts to boost renewable power consumption while ensuring stable operation of the electric grid system, a statement released by the National Development and Reform Commission and the National Energy Administration said.

Including clear policy guidelines in the upcoming amendments to the National Electricity Policy, Tariff Policy, and in the final version of NITI Aayog's 2017 Draft National Energy Policy on energy storage can provide a market signal to spur development and direct regulatory authorities to begin implementing targeted regulations. These should address the many services that storage can ...
