

New Energy Aluminum Battery Stocks

Should you invest in battery stocks?

Investors have many ways to play the "green wave," or the pivot to a net-zero carbon world, but alongside EV stocks, hydrogen fuel cell stocks, solar stocks and other renewable energy plays, battery stocks are another strong choice. A big reason is that the pivot away from fossil fuels will not happen without advanced battery technology.

Which are the best battery stocks to buy?

ALB is one of the attractive dividend growth stocks to consider among the best battery stocks to buy. Lithium Americas (NYSE: LAC) is another name among lithium producers that is one of the best battery stocks to buy. It has a bright long-term outlook, with quality assets in the United States and Argentina.

Should you buy battery stocks in 2024?

The International Energy Agency predicts a tenfold increase in battery demand for electric vehicles over the next decade. Battery stocks haven't fared well for much of 2024, but a big rally has put them back in the spotlight. The Global X Lithium & Battery Tech ETF (ticker: LIT) gained more than 20% in September.

Are the best battery stocks underperforming this year?

The best battery stocks have underperformed this year, with their correction in-sync with the downside in electric vehicle stocks. Despite this, there is no doubt that the best part of growth for electric vehicles is still to come. Global EV penetration has increased to 8.8% in 2021.

Should you buy EV battery stocks?

Investors don't have to pick a winning automaker -- they can buy shares of battery stocks instead. The range of options in EV battery stocks goes from pre-revenue to one of the world's biggest automakers. The automotive industry is going electric. Every major automaker is actively developing or already selling electric vehicles (EVs).
