What is the global lead-acid battery market size?

According to our (Global Info Research) latest study, the global Lead-acid Battery market size was valued at USD 65480 million in 2022 and is forecast to a readjusted size of USD 80350 million by 2029 with a CAGR of 3.0% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

What is a lead acid battery?

Although the process of data verification is an integral part of the research process, all data points and statistics and figures are re-checked to uphold their authenticity and validity. Lead acid batteries are rechargeable batteries consisting of lead plates with a sulfuric acid/water electrolyte solution.

What are the advantages of lead acid batteries?

One of the singular advantages of lead acid batteries is that they are the most commonly used form of battery for most rechargeable battery applications (for example, in starting car engines), and therefore have a well-established, mature technology base.
