

Outdoor Solar Lighting Outdoor Backup Power

What are the benefits of outdoor solar lighting fixtures?

Outdoor solar lighting fixtures can completely change the look and feel of your lawn and other outdoor spaces by providing attractive lighting. They can light your sidewalk or point to a landscaping feature that you want the world to see, such as a waterfall. Additionally, they can be used to light up the garden for tending to it at night.

How do I choose the best outdoor solar lights?

Determine what you need to be illuminated and where you have space to install outdoor lights to find the best outdoor solar lights for your space. Our top pick for most outdoor spaces is the AloftSun Motion Sensor Solar Landscape Spotlights.

Are outdoor solar lights right for You?

Outdoor solar lights can light up your walkway, backyard, or porch without the need to find an electrical outlet or worry about running low on battery. But finding the right solar lights for you can depend on several factors, as well as your budget.

What are the different types of outdoor solar fixtures?

Our outdoor solar fixtures can light up your sidewalk or point to a landscaping feature such as a waterfall or help you tend to your garden at night. Some of the popular options include: solar motion sensor lights, solar garden lights, decorative string lights, and lanterns. We also offer various kits and sets.

What are the different types of outdoor solar lights?

Based on their light output, outdoor solar lights fall into three general types: motion-activated, dusk-to-dawn, and timer-controlled. Because of solar cell size and battery capacity, the solar energy gathered is a limited resource, so consider when you want the lights to shine and for how long.

How do outdoor solar lights work?

Outdoor solar lights contain several key components, including solar cells, rechargeable batteries, photoresistors, and lightbulbs. During the day, solar cells convert the sun's rays into electricity, which the batteries store. At night, photoresistors detect the absence of ambient light and switch on the units.
