

Outdoor solar pole light street light does not light up

What happens if the solar street light does not light up?

If it does not light up, there is a problem and a new light source should be replaced. After the solar street light has been used for a period of time, even if there is enough sun light at day, it may encounter that the lighting time of street light is short and the lighting cannot be provided normally on cloudy and rainy days.

Why is my solar street lamp not working?

When installing solar street lamp, some customers may encounter such a problem. The LED light source turns on as soon as it is installed and cannot be turned off. When this happens, first check whether the positive and negative poles of the solar panel are connected correctly. If the connections are reversed, correct them in time.

Why are my solar lights not lighting up?

It sounds simple, but it's an easy detail to overlook. Almost every solar light has an on/off switch, typically located at the back. During the day, the solar panel charges the battery, but if the switch is off, the lights won't turn on when night falls. So, if your solar lights aren't lighting up, the first thing to check is this switch.

How to fix solar lights not working?

Switch your solar light to a different location and see if the problem is fixed. Place it in a location with adequate sunlight during the day and no intervention from other artificial lights at night. So, these were a few common ways to fix Solar lights not working.

Why are my solar lights not working at night?

During the day, the sensor keeps the solar lights off while the solar panel charges the battery. When night falls, the sensor detects the decrease in light and activates the solar lights. If this sensor is not working correctly, it might not be able to tell when it's dark, and as a result, your solar lights won't turn on at night.

Why does my solar light need to be taken out?

Solution: To save battery life, when the solar light is shipped, the manufacturer uses a small tab in between the battery and the battery terminal. If your solar light has this tab, it needs to be taken out for the light to illuminate. 5. Is the battery installed correctly? Solution: Be sure the battery or the batteries are installed correctly.

Solution: Check the ON/OFF switch on the solar light and be sure it is turned ON. Some solar lights are turned on by pushing a small button (in a small hole) using a small piece of metal such as a paperclip. See pictures ...
